

## Skin Care and Over-the-Counter Skin Products

Office Phone: 540-885-4500

Call Marlana (Extension 108) if you have any problems with your prescription medicine affordability.

If you have difficulty finding a product, please try [www.amazon.com](http://www.amazon.com), [www.aveeno.com](http://www.aveeno.com), [www.neutrogena.com](http://www.neutrogena.com), [www.cerave.com](http://www.cerave.com) or [www.olay.com](http://www.olay.com). For DML/DHS/Aquanil/Solbar products, please go to [www.personandcovey.com](http://www.personandcovey.com).

To avoid damage from the sun, follow all of the following precautions **every morning of the year, no matter the weather or time of year, to all daylight-exposed skin**. Use a sunblock/screen with an **SPF of at least 30**. The product must state "UVA/UVB" protection on the label. If you have oily skin, try any sunscreen that is labeled "gel" or "oil free liquid". Apply all sun blocks/screens 20 minutes before sun exposure so it dries on your skin before daylight exposure. Reapply every 2 hours, no matter what the SPF is, onto **dry** skin (except "wet skin" formulation). The ingredients "**titanium dioxide**" and/or "**zinc oxide**" mean it is a sun block as well as a sunscreen. The sunblock line of TIZO ([www.tizoskin.com](http://www.tizoskin.com)) is a good example of this. Protect the lips with a sun block/screen or a Chap Stick with SPF and reapply throughout the day. **Choose body and facial moisturizers that contain a high SPF**. Sunless tanning lotions do NOT provide any protection from the sun, unless they contain an SPF.

The American Academy of Dermatology recommends that patients only use sunblocks/sunscreens that are labeled to have broad UV spectrum coverage of UVA and UVB, have an SPF of at least 30 and be water resistant. Avoid spray products as often most goes out into the environment and some sits on the hair of the skin.

Wear a wide brimmed hat to cover ears and neck ([www.tilley.com](http://www.tilley.com)). Wear polarized sunglasses – sunlight can cause melanoma and cataracts in the eyes and skin cancers on the eyelids. **Avoid tanning beds!** People who use tanning beds have a 75% increased risk of developing melanoma, have a 2.5 times greater risk of developing squamous cell carcinoma and a 1.5 times greater risk of developing basal cell carcinoma. Like sunlight, tanning beds also accelerate the signs of aging in the skin. **The American Academy of Dermatology recommends that an adequate amount of vitamin D should be obtained through a healthy diet that includes foods naturally rich in vitamin D, foods/beverages fortified with vitamin D, and/or vitamin D supplements.** Vitamin D should **NOT** be obtained from unprotected exposure to sunlight. Your doctor can order a blood test that measure your vitamin D level if you are concerned that you are not getting enough vitamin D.

**Dry Skin Care:** Shower in warm (not hot) water for a short period, not more than once per day. Use a non-soap cleanser (see below). Pat dry and within 3 minutes of exiting the shower, apply a moisturizing cream or ointment (**not lotion/oils/butters**); see below for recommended creams and ointment. The skin is an acidic organ and so we want to avoid soap, which is an alkali.

### **Non-Soap Cleansers:**

**Bar form** – Aveeno Moisturizing Bar, Dove Sensitive Skin Unscented Bar, Cetaphil Gentle Cleansing Bar, Cerave Hydrating Cleanser Bar

**Liquid Form** – Aveeno Daily Moisturizing Body Wash, Dove Sensitive Skin Liquid, Cetaphil Daily Skin Cleanser, Purpose, Aquanil Cleansing Lotion, Spectrojel, Cerave, Oil of Olay, Impruv, Neutrogena Ultra Gentle Hydrating Cleanser.

**For rosacea** – Aveeno Ultracalming Foaming Cleanser, Eucerin Redness Relief Cleansing Gel, Cetaphil Redness Relieving Foaming Face Wash

### **Moisturizing Body Creams: Do not use lotions, oils or butters. Apply every 12 hours.**

Aveeno Skin Relief Cream, Cerave Renewing SA Cream, Cetaphil Moisturizing Cream, Eucerin Calming Cream, DML Forte Cream, Acid Mantle Cream, Udderly Smooth Body Cream, Gold Bond Ultimate Healing Concentrated Therapy Cream.

### **Moisturizing Ointments: Greasy, good for bedtime use.**

Cerave Healing Ointment, Aquaphor Healing Ointment (generic – CVS Hydrating Healing Ointment).

If still itchy despite following directions above for dry skin, add an anti-itch product such as Sarna Ultra Cream, Original or Sensitive Skin Lotion, Amish Origins Deep Penetrating Ointment, Neutrogena Soothing Relief Anti-Itchy moisturizer, Aveeno Anti-Itch Cream, Eucerin Calming Anti-Itch Lotion. These products contain cooling agents such as menthol and camphor. Pramoxine-containing products such as Cerave Itch Relief cream act as an anesthetic to stop the itching.

**Moisturizing Hand Creams: After every hand washing**

Aveeno Intense Relief Hand Cream, Cetaphil Therapeutic Hand Cream, O’Keeffe’s “Working Hands” Cream; Oil of Olay Quench Hand Cream, Eucerin Plus Intensive Hand Cream, Cure Hand Cream, Neutrogena Hand Cream.

**Moisturizing Daytime Face Creams (365 days a year): Should have an SPF of at least 30**

**For women:** Aveeno Positively Radiant SPF 30 or Positively Ageless SPF 42, Cetaphil Defense SPF 50, Neutrogena Healthy Defense SPF 45, Oil of Olay Regenerist Facial Lotion SPF 50, DML Facial Moisturizer SPF 25.

**For men (Available in your store’s Shaving Section):** L’Oreal Men Expert After Shave Balm SPF 15, Neutrogena Men Age Fighter Moisturizer SPF 15, Dove Men Care Face Lotion SPF 15.

**For Rosacea Patients:** Aveeno Ultra-Calming Moisturizer SPF 15 or 30.

**For Acne Patients:** Aveeno Clear Complexion Moisturizer SPF 30, Neutrogena Clear Face Liquid SPF 35. : Sensitive Skin SPF 30 or 50.

**Night Creams:**

Aveeno Positively Ageless Cream, Neutrogena Hydro Boost Gel-Cream, Olay Regenerist Night Sculpting Cream.

**For Acne Patients:** Neutrogena Oil-Free Moisture Lotion, Aveeno Oil Free Night Cream.

**Using a Topical Retinoid:** Cleanse with a non-soap cleanser, pat dry, apply non-retinol moisturizer and **let it dry** (just long enough to brush and floss your teeth!). Apply pea-sized amount of the retinoid to the entire face and rub it all over. May reapply moisturizer if desired. Skin will get dry and peeling in the first few weeks is normal until the skin gets used to the retinoid. Acne will get worse before it gets better if not on an oral antibiotic. The American Academy of Dermatology recommends no more than 3 months of oral antibiotics.

**For Keratosis Pilaris:** AmLactin 12 Cream, Carmol 10 or 20, Acid Mantle Cream, Aquaphor Ointment.

**Shampoos for Seborrheic Dermatitis/Flaking Scalp/Facial “T-Zone” Scale/Scaling Ears:**

*Pyrrhione zinc* – Head & Shoulders, Denorex, DHS Zinc, ZNP Bar.

*Selenium sulfide* – Head & Shoulders Intensive Treatment (dark blue bottles), Selsun Blue.

*Coal Tar* – Neutrogena T/Gel Shampoo, DHS Tar Shampoo.

*Salicylic Acid* – Neutrogena T/Sal Shampoo, DHS Sal Shampoo.

*Conditioner after shampooing with any of the above* – Head & Shoulders Conditioner

**Hypoallergenic/Hypoirritant Products:**

*Deodorant* – Secret Gentle Care Unscented, Dove Sensitive Skin Deodorant, Almay Clear Gel, Lumē.

*Sunscreen* – Neutrogena Sensitive Skin Sunblock, EltaMD Tinted Physical Block, Vanicream Sunscreen, Blue Lizard Sensitive Mineral Sunscreen.

Entire product line of hypoallergenic products: Vanicream (vanicream.com)

*Makeup* – Almay.

*Shaving gel* – Aveeno Ultra Calming Shave Gel, Neutrogena Triple Protect Gel, Nivea Sensitive Skin Gel, Tend Skin Shave Gel, Bump Fighter Shaving Gel.

*To treat “shave burn”* – Aquanil HC Lotion.

**Nail and Hair Health Products:** Elon products (www.elonessentials.com).

**Hair Loss:** Minoxidil 5% lotion (Rogaine Extra-Strength) twice daily (cheaper generic brand at CVS), okay for women to use if kept off of face and not used if pregnant or nursing.

**Scars:** Silicone sheets, such as Scar Away, to thin out thick scars (in band-aid section or online); Mederma Cream for moisturizing the scars.

**Wart Care:** During/after shower/bath, remove the dead skin from the wart with a pumice stone or cuticle clippers. Apply prescription Efudex cream, then prescription 40% salicylic acid and cover with surgical tape or duct tape. Do not remove tape until next treatment; reapply tape and meds if wet. Repeat treatment every 24 hours – may take up to 3 months for wart to completely disappear.
